

Press Release

PG Comms to exhibit new IP-PBX solutions at CommunicAsia 2008

Singapore, 17th June 2008

PG Communications will unveil its latest internet based phones systems solutions for SoHo/SMBs at the CommunicAsia 2008 in Singapore. It will showcase its hosted and CPE-based IP-PBX solutions, OfficeOne & OfficeStar, to potential customers and resellers in the region. Companies interested in finding out more about OfficeOne and OfficeStar are most welcome to visit PG Comms booth 3E1-11 at Singapore Expo from June 17-20, 2008.

PG Comms is pleased to introduce its new hosted and CPE-based IP-PBX solutions to its existing portfolio of communications services to business customers. PG Comms has successfully integrated cutting edge solutions from leading vendors and will introduce a range of smart IP-PBX product bundles with the premium end devices from SNOM Technology AG, a leading developer and manufacturer of Voice over IP (VoIP) telephones. These bundles will enable customers, system integrators and resellers to implement full PBX featured VoIP solutions easily, within minutes.

OfficeOne is a feature-rich IP-network based PBX that allows business owners to communicate more efficiently without the usual cost associated with setting up an office communications system. From as low as **S\$19** a month per account, customers can subscribe to an OfficeOne PBX Account and enjoy full PBX functionality including auto-attendant, voice mail, free extension calling anywhere, low cost international calling, conference calls and many other advanced features. Customers will achieve significant cost savings with subscription based charges, zero capital investments, true mobility and flexibility to add or delete accounts at any time. OfficeOne is most suited to SOHO/SMEs with up to 10 employees.

OfficeStar on the other hand is a CPE-based IP-PBX equipment developed for small and medium businesses. It integrates the analog telephone lines within the IP-PBX software thereby eliminating the need to manage the PBX on a separate server and help businesses save cost and increase efficiency. Besides offering full PBX

functionality, it also supports music-on-hold input, paging, intercom and auto-provision of premier IP phones like SNOM.

OfficeStar is the perfect solution for small and medium businesses to enjoy both the benefits of VoIP and the option to keep their existing analog telephone lines. It eliminates costly add-ons, is easy to use, easy to manage and delivers the broad practical functionality that businesses demand. Businesses are able to integrate all their subsidiaries, sales offices and telephones across geographical locations into one centralized OfficeStar. This enables businesses additional benefits of free worldwide internal calls, cost reduction and productivity gains that bigger corporation spends hundreds of thousands of dollars to achieve.

Both OfficeOne and OfficeStar have full security support (TLS/SRTP) for secured voice communications not found in most run of the mill solutions.

About PG Communications

PG Comms is a wholly-owned subsidiary of Inno-Pacific Holdings Ltd, a public company listed on the Singapore Stock Exchange. It is a licensed service provider in Singapore and Malaysia focused on delivering innovative and quality global telecommunications services to enterprises at affordable and competitive prices.

About SNOM Technology AG

snom technology AG develops and manufactures Voice-over-IP (VoIP) telephones and related equipment based on the IETF open standard SIP (Session Initiation Protocol). Recognized for its high-quality, customizable and cost-effective business solutions, snom is also differentiated by the company's ten-year history in the VoIP industry, and its dedication to high security standards.
